

Experienced Grazing Dairy Professional

Join a progressive, family-run dairy operation as a key member of our small and dedicated team. At our farm near Carthage, MO we believe in working hard and working smart, and we compensate fairly for both. We currently milk 400 non-GMO cows, grazing them on grass, alfalfa, and annuals for over 300 days a year. We're actively planning for the future, with intentions to expand our herd to 600-700 and make significant improvements to our infrastructure by retrofitting our swing parlors.

This is a unique opportunity for an experienced professional who shares our passion for efficient grazing. We are always looking for ways to improve, and we are excited to be looking into cutting-edge technologies like virtual fencing and PaddockTrac for the upcoming grazing season. You won't just be a part of the team; you'll be a leader in this transition, helping us to implement and manage these new systems.

The culture here is built on hard work and collaboration. We all put in a lot of hours daily, especially during the busy spring calving season. However, we value our team's commitment and believe in paying well for it. The winter offers potential for time off as the cows dry off, providing a nice balance to the seasonal demands. We are a tight-knit crew of family members and one or two other people, and we are looking for someone who is ready to be an integral part of our future. Very nice on-site housing available.

To learn more or to talk about the position please call Ross Birkenfeld at 972-439-4412
