

Practical Information You Can Use

Managed Grazing Innovation Center provides high quality education on managed grazing production systems, farm business management, and conservation stewardship in an online format.

EARN A MANAGED GRAZING DAIRY CERTIFICATE

Courses

Dairy Cattle Nutrition, Feeds and Feeding

Milk Quality

Farm Business Management

Soil and Water Resources Management

Dairy Cattle Health and Wellness

Managed Grazing Systems for Dairy Cattle

Managed Grazing Innovation Center is an online school that is open to everyone and does not require participation in the Apprenticeship.

Classes are intended to enhance the knowledge base of students, and are designed for planning purposes as well as for practical application on working farms.

Students may take individual classes and/or complete all six within five years to earn a **Managed Grazing Dairy Certificate**.

MGIC classes are one credit (36 hours).
Spring Semester and Fall Semester are 12 weeks.
Summer Session offers a condensed version of select classes for 6 weeks.

All classes combine independent study with synchronous educational opportunities as well as one-on-one support from MGIC School Director, Jamie Washburn. (Certificate courses are required for and transferable to the Apprenticeship.)
